this book aims to clarify how to build the computational infrastructure for multi access edge
 computing mec from the perspectives of applications system software architecture cad and devices
 mec enables the execution of processing tasks that are challenging for iot devices without having to
 rely on the cloud by equipping 5g 6g base stations with computational resources following the
 introduction chapter 2 describes the multi fpga system that was developed for this project with
 various techniques to build fpga clusters chapter 3 discusses the middleware for mec and
 applications such as social implementation in nursing care facilities chapter 4 focuses on the roles
 of mec such as anonymization data collection and selection and describes the technologies for
 utilizing mec in the construction of smart cities chapter 5 discusses the realization of robot audition
 one of the most promising applications expected to run on mec it introduces an attempt to
 implement hark a widely used platform on mec chapter 6 presents a new fpga device slmlet which
 is more cost effective and power efficient than conventional fpgas and features communication
 links for multi node systems it is an ambitious chip equipped with variable structure ip differing
 from traditional fpgas the readers will gain an understanding of mec and related topics as well as
 insight into its future potential this knowledge is essential for engineers involved in cloud and edge
 computing as well as those interested in fpga and cad technologies
